

# 1100 Series IP Deskphones

The ergonomically designed 1100 Series IP Deskphones are available in a range of models for employees in every area of your business. These phones feature message waiting, incoming call, and data messaging indicators, and icon- and text-based keycaps. Several models offer integrated Bluetooth® audio gateways for increased mobility, and Gigabit Ethernet PC and LAN ports for future expandability.

## ENHANCE PRODUCTIVITY FOR ALL USERS

A sleek, ergonomic design comes in a range of models to suit employees at every level of business. High-resolution displays support data and web-based applications—with USB peripheral support on some models for easier navigation. All of the 1100 Series IP Deskphones provide a local secure tools menu for simplified administration and tight integration to Avaya platforms such as Communication Server 1000, the Avaya Aura™ and Avaya IP Office™ platforms.

Features like high-resolution displays, USB connectivity, and XAS and G-XAS application support give users productivity enhancing access to information and multimedia. Integrated auto-sensing Ethernet 10/100/1000 Base-T switches with shared PC access (one LAN port and one PC port) help consolidate cable infrastructures. Power options, including 802.3af PoE, help cut costs further. Gigabit Ethernet switching helps future-proof your investment.

# 1110 IP Deskphone

This single-line, standard-level IP Deskphone is an ideal solution for knowledge workers with standard communication needs, and in schoolroom, main lobby or conference center environments. It integrates a fully backlit display, an IEEE 10/100 switch with LAN and PC ports and features the sleek, ergonomic design of the 1100 Series IP Deskphones.

# 1120E IP Deskphone

Suitable for knowledge workers and administrative personnel, this multi-line, intermediate-level desk phone delivers innovative features. These include a high-resolution grayscale display, an integrated 10/100/1000 switch with LAN and PC ports, and a standard USB port.

# 1140E IP Deskphone

Designed for managers, executives, knowledge workers and senior administrative staff, this multi-line, professional-level desktop phone delivers enhanced communication capabilities, a large high-resolution graphical grayscale display, an IEEE 10/100/1000 switch with LAN and PC ports, an integrated Bluetooth audio gateway, and a standard USB port.

# 1150E IP Deskphone

Specifically optimized for call-intensive environments such as IP Automatic Call Distributors and Contact Centers, the 1150E is a multi-line phone that features a large, high-resolution grayscale display, an IEEE 10/100/1000 switch with LAN and PC ports, an integrated Bluetooth audio gateway for agent support, and a standard USB connection.

# 1165E IP Deskphone

This multi-line professional-level phone offers a high-resolution, fully-backlit QVGA color LCD display, an integrated Bluetooth audio gateway, and an integrated switch with Gigabit Ethernet LAN and PC ports.

# 1100 Series Expansion Module

This module adds 18 self-programmable line/feature keys to the 1120E, 1140E, and 1150E IP Deskphones.
