

# E100 Series SIP Phones

## Innovative and Cost-Effective SIP Communications Devices

### E100 Series SIP Phones

Help drive better communications and collaboration among office, remote, and mobile workers. These devices use standards-based SIP to bring the most often used and impactful call handling features to workers regardless of where they are located.

## ESSENTIAL CALL HANDLING FEATURES FOR A WIDE RANGE OF COMMUNICATIONS USES

Avaya E100 Series SIP Phones are a unique array of devices supporting communications and collaboration among office, remote, and mobile workers. These purpose-built devices use standards-based SIP to bring the most often used and impactful call handling features to workers, regardless of where they are located.

### E169 Media Station

Turn your every day, everywhere mobile device into a corporate communications tool. Just dock an Apple iOS or Android smartphone or tablet in the E169 Media Station and log in. You'll have a secure connection to your corporate network and superb audio quality. With or without a smart device docked, the E169 Media Station delivers the basic calling features you use most—call, transfer, mute, and conference—all via an easy-to-use interface.

### E129 SIP Deskphone

Ideal for use on desktops and in many other locations—including lobbies, waiting rooms, warehouses, classrooms, and retail spaces—the Avaya E129 SIP Deskphone delivers basic SIP telephony capabilities, enabling enterprises to replace older analog or digital phones with advanced technology. The E129 SIP Deskphone provides frequently used features, including three-way ad hoc conferencing, hold, mute, and forward. It

includes three context-sensitive soft keys, a monochrome display, and support for two concurrent calls using a Flash key.
